Overview

With the landscape of increasingly frequent and complex network attacks, financial institutions need next-generation security appliances more than they ever have before. In an industry where time really is money, these appliances have to integrate seamlessly with the network to keep systems secure without slowing down operations.

The Mission Multiplier SATURN-i has you covered with a next-generation firewall, intrusion prevention, bandwidth control, and more, all in an easy-to-install and affordable package. With the SATURN-i on your system, client data is safe, access to business-critical data is immediate, and satisfying compliance standards is simple.

Solutions Perfect for the Financial Industry

Take a look at some of the biggest benefits the SATURN-i has to offer businesses in the financial industry.

Next-Generation Firewall

Mark a crystal clear line that separates external networks from yours. Use our next-generation firewall to filter traffic based on IP address, protocol, and port, as well as designate which systems and services (HTTP, FTP, etc.) are publicly available.

Stop Threats in Their Tracks

Block would-be intruders, phishing attempts, viruses, ransomware, botnets, even annoying ads before they come anywhere close to infiltrating the system with a whole suite of protection and filtering applications.

Keep Critical Info at Your Fingertips

Ensure that business-critical traffic is always given top priority. Bandwidth Control enables you to optimize bandwidth usage so recreational and inappropriate traffic do not impact critical administrative and customer service systems.

Firewall	Intrusion Prevention	Phish Blocker	Virus Blocker	Ad Blocker	Spam Blocker	Application Control
SSL Inspector	Web Filter	Bandwidth Control	IPsec VPN	Policy Manager	Reports	Command Center

SATURN-i Has You Covered

✓ Firewall, Router, Advanced Antivirus, Intrusion Prevention and Phish Blocking to stop malware from entering your network
✓ Prioritize network traffic for business-critical applications
✓ Active Directory/LDAP integration
✓ HTTPS/SSL traffic inspection
✓ Layer 7 application awareness to identify all incoming application traffic regardless of port destination
✓ Prevent network slowdowns caused by any individual or group of users and applications
✓ Unique and granular policies for specific organizational departments and users
✓ Granular, real-time reporting that lets you drill-down to control and see individual user activity
